Mr Ian McLeod
Chief Executive Officer
Ergon Energy Corporation Ltd
PO Box 15107
City East QLD 4002

Dear Mr McLeod

Clause 6.8 of the *Electricity Industry Code* (the Code) requires the Authority to review annually whether the 'Minimalist Transitioning Approach' (MTA) arrangements adopted by Ergon Energy should be retained for a further year. In doing so, the Code requires the Authority to consult with Ergon Energy, retailers and any other party with a legitimate interest in whether the MTA should be removed.

Based on the information submitted by Ergon Energy and in the absence of any submissions to the contrary, the Authority has decided that the MTA provisions will remain in force for a further year and be reviewed again in 2011 in accordance with the Code requirements.

Please note that, as required by the Code, Ergon Energy must continue to include a notice on its website specifying that the MTA arrangements apply.

If you have any queries regarding this matter, please contact Gary Henry on (07) 3222 0504.

Yours sincerely

EJ Hall
Chief Executive
