

## **Submission on feed-in tariff review 2025-26**

**From:** Girgenti, S.

**Date:** 28 March, 2025

I am looking at your proposal to reduce the feed-in tariff and find it unbelievable that it is reducing. It must be the only thing that is decreasing in the world.

The price that I pay is increasing and so the price for feed-in should also increase!

I ask that you reconsider the feed-in tariff as eventually there will be no small-scale power suppliers and then it will destroy the grid potential.
