Dear Sir or Madam:

I am a single mother supporting five children, although we do not have town water connection I rely on delivered water for drinking and cooking. The rented house we live in has limited tank supply and the dam is not fit for human consumption as cattle and horses use it. If this intended price rise goes ahead we will have no option but to use the dam water as my pension is stretched to the limit paying \$100.00 a load for water. No way can I afford over \$300.00 for water.

I moved from the city to give my children a better way of life now you are forcing me to give them ear infections bladder infections to name a few because I can't afford to buy treated water. We demand to be treated better than second-class citizens and we deserve it. Thank you very much, and my children thank you too.

Sincerely yours,

Liza, Wesley, Hayden, Amanda, Jodie & Allan Crosswell
