Subject: Electricity Price Queries

Hello Angus

I now have final answers on the two electricity questions from last week.

1. Wivenhoe Dam electricity contract – the only escalation provision is 23.1% of the network pricing. Network power comprises 59% of the contracted supply.

2. Clarendon Dam off peak tariff should have been $0.1172/kWh instead of $0.0072/kWh as was advised to me.
