**Subject:** RE: Water Use Data

Dear Peter

Please confirm that you are saying it is SunWater's view that the most accurate and reliable water use figures (all sectors and irrigation) are, **in strict order of priority**, to be adopted as follows:

1. 2010-11 water use data provided by SunWater on 26 October 2011
2. 2002-03 to 2009-10 – data from the NSP Usage Analysis worksheets for each scheme that SunWater provided to us in a disk on 10 March 2011
3. Tier 1 water use data (for example, 2001-02)
4. 2001-02 only water use data from Annual Report 2001-02, where needed as a last resort.

This will form part of a briefing to Government officers early next week.

Kind regards

**Angus MacDonald**
