

SMALL GAS CUSTOMER DISCONNECTIONS, HARDSHIP AND COMPLAINTS STATISTICS – MARCH QUARTER 2013

Introduction

Clause 5.5.1 of the Gas Industry Code (the Code) requires that the Authority monitor and publish information on the number of small gas customer¹ disconnections, and complaints.

During the March quarter 2013, there were four gas distributors and seven gas retailers in Queensland (AGL and Origin Energy each hold two retail licences). Maranoa Regional Council and Western Downs Regional Council each hold distribution and retail licences that permit them to retail gas to customers only within their specific distribution areas.

Customer disconnections

The Authority defines disconnections to include all instances where a small customer's gas supply has been physically terminated by the distributor irrespective of the method of disconnection.

Retailer initiated disconnections

Clause 5.5.2 of the Code requires that all gas retailers provide information for the previous quarter relating to:

- (a) the total number of small business and residential customers who were disconnected;
- (b) the number of small business and residential customers who were disconnected due to non-payment; and
- (c) the number of pensioners or concession card holders who were disconnected due to non-payment.

Clause 5.5.4 of the Code requires all distributors to report quarterly the total number of small customer disconnections and the number of disconnections due to non-payment (separated into business and residential customers) that the distributor performed at the request of each retailer.

Retailer and distributor information on the number of small customers disconnected is provided in **Table 1**. Information from retailers and distributors related to disconnections for non-payment is presented in **Table 2**.

Overall, retailers reported 788 (50.2%) fewer disconnections than distributors. Discrepancies may be due partly to slight timing differences between when retailers and distributors become aware that service order requests for disconnections have been completed. However, the current discrepancy is largely due to Origin, which reported significantly fewer disconnections than the distributors after two months of reporting significantly more. Detailed analysis by Origin has not yet resolved the issue, however the Authority will continue to try and resolve this issue.

¹ A small gas customer is defined as a residential or business customer whose gas consumption is under one terajoule per annum.

Disconnections performed at the instigation of distributors

Clause 5.5.4 of the Code requires that all distributors provide information for the previous quarter relating to:

- (a) the total number of small business and residential customers who were disconnected at the instigation of the distributor; and
- (b) the total number of small business and residential customers who were disconnected at the instigation of the distributor due to non-payment of bills, safety reasons and 'other' reasons.

This information is shown in **Table 3**.

Customer reconnections

Clause 5.5.2 of the Code requires that all gas retailers provide information for the previous quarter relating to:

- (a) the total number of small business and residential customers who were reconnected with the same name at the premises after being disconnected due to non-payment;
- (b) the total number of small business and residential customers who were reconnected within seven days with the same name at the premises after being disconnected due to non-payment; and
- (c) the number of pensioner or concession card holders who were reconnected with the same name at the premises after being disconnected due to non-payment for the previous quarter.

Reconnections occur when the flow of gas to a small customer's premises has been restored after a disconnection.

This information is shown in **Table 4**.

Hardship program participation by small residential customers

Clause 5.5.2 of the Code requires that retailers provide information on the level of hardship program participation by small residential customers for the previous quarter (see **Table 5**). A hardship program allows for a customer with payment difficulties to be removed from a retailer's normal debt collection activity and allowed extended payment arrangements.

The number of customers participating in a hardship program provides an indication of the level of energy affordability in the gas market. This measure also reflects the effectiveness of retailers' programs to identify customers experiencing payment difficulties and retailers' general debt collection practices. In this case, "debt" is defined as the dollar amount which has been outstanding to the retailer for the sale or supply of gas for a period of 90 days or more.

Customer complaints

Clause 5.5.3 of the Code requires that gas retailers provide quarterly information on the number of complaints received from their small business and residential customers in respect of their actions or omissions as a retailer, in the following categories:

- (a) total complaints;
- (b) billing or account complaints;
- (c) marketing complaints; and
- (d) other complaints

Complaints are defined as a written or verbal expression of dissatisfaction about an action, or a failure to act, or in respect of a product or service offered or provided, by a gas retailer.

This information is shown in **Table 6**.
